

AUTHORCATION

Authorcation

Use our crypto to easily gain ownership to
personally autographed books and profits!

www.authorcation.com | hello@Authorcation.com

Preface

Authorcation is a token that operates on the Binance Smart Chain meaning there are virtually no gas fees and almost instantaneous swaps! Authorcation is a community project, meaning that the community will be involved in the development of the project, each member will be able to participate in discussion and submit ideas. Authorcations main goal is to revolutionize the personally autographed book industry as well as create a platform that authors use to charge more for their personally autographed books, where they get paid in Authorcation crypto.

Tokenomics

10,000,000,000
total supply

10%
for marketing,
dev costs etc

5%
to liquidity

Authors

Authors will be able to upload their book and information with fans able to pay in our Authorcation crypto!

Crypto does not have as many handling fees as fiat, therefore we are able to charge a more competitive rate, providing authors with a greater income.

Our platform has no fee to the author, which is a lot less than the other book selling platforms! That difference can make a world of difference to authors' trying to establish themselves in a competitive niche.

Authors have the potential to earn passive income through the redistributive nature of our token (as long as the price continues to rise).

We want to take personally autographed books, a multi billion dollar industry, and put it on the blockchain. It will be the first marketplace of its kind.

Our future plans include exploring other ways authors can earn a living through our crypto currency. The possibilities are endless and nobody has done this on Binance Smart Chain (BSC).

The platform is a work in progress and we aim to make it as accessible as possible (for authors who may be new to crypto, but see the benefits that being paid in crypto gives).

Authorcation has the potential to be a great disruptor to the personally autographed book industry; providing unique ownership to customers and giving authors greater value for their content.

Regulation

We aim to be pioneers in placing personally autographed books on blockchain. This is a challenge but also a great opportunity to lead the field in this new market to demonstrate how crypto & blockchain can be used to help authors sell more books.

We encourage input from all members of our community which may contribute to our goals.

Transparency

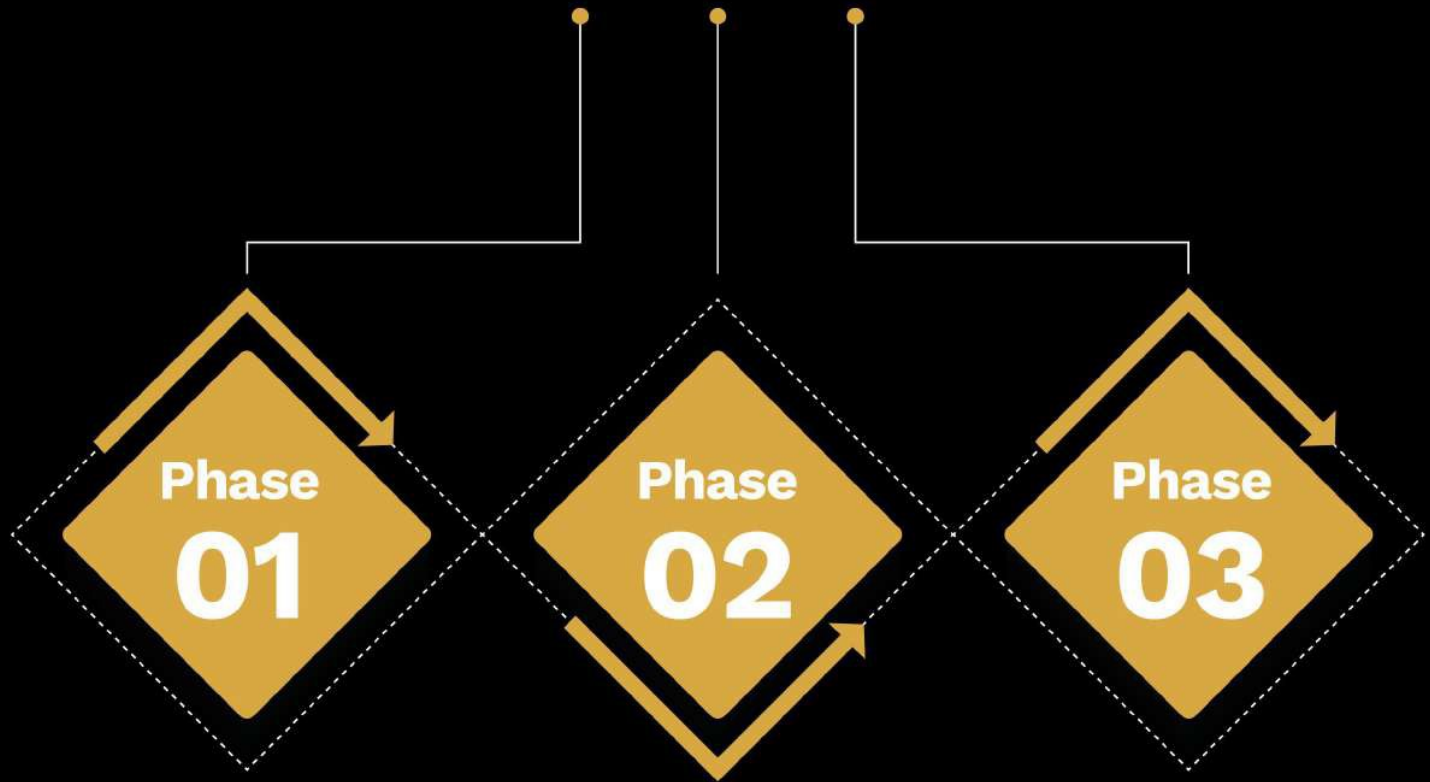

We maintain an active status on our Telegram platform to answer any questions you may have and to enforce a strong community spirit!

We feel this is incredibly important considering how many projects get abandoned by the developers.

There is a team wallet that will be used for any costs associated with the project, for example; marketing, dev costs, exchange listing costs etc.

ROADMAP

Design for
Website/Social Media
Social Media Launch
Website Launch

PancakeSwap Logo
Influencer Marketing
Fair launch through
Pancakeswap

Coin Gecko Listing
CMC Listing
Application to CEX
Merch Drop
Website Improvements
Increase of staff & Team
Major Ad & Infleuncer
campaigns.
